

2022 - 2024

SAFETY SIGNS CATALOGUE

Welcome to our 2022 - 24 Catalogue

This catalogue includes hundreds of new products, innovations, updates, redesigns and range extensions, making it our most comprehensive catalogue to date. We are confident that you will find the sign that you are looking for, but if you can't, we are more than happy to offer a bespoke solution to meet your requirements.

As ever we have kept an eye on changes to legislation and have developed innovative and practical products to ensure we continue to offer a comprehensive range of Health and Safety Signs and safety related products.

You can find more information about our most popular materials, along with details on how to order our signs, on pages 2 - 5.

Wherever possible all signs shown within this catalogue have been designed to display an approved ISO 7010 symbol. On the rare occasion where a symbol has yet to be adopted by International Standardisation, but has proven comprehension levels under BS 5499, these signs will be manufactured to BS 5499 Standards. Our signs also meet the required colorimetric and photometric properties as specified in BS ISO 3864 to provide a consistency in colour and design at all times and ensuring our customers receive a "technically correct" safety sign that meets all relevant UK legislation.

New and Featured Products

We offer a wide range of unique and innovative products throughout this catalogue. Below is a small sample of our latest and featured products. If you believe there's a popular range of products we don't currently provide please contact us and remember, if you don't find the item you require please let us know and we'll do our best to find a solution.

Eco-Friendly Signs

90 - 91

PPE Stations

72 Electric Vehicle Signs

Coronavirus Signs

105

43

138 - 141

131 - 135

We are pleased to be able to offer customers an eco-friendly option when choosing their safety signage.

To help our customers identify signage that can be recycled, we have included a recycling logo on pages where signs can be recycled and have dedicated a section to some of our more popular signs in eco-friendly materials.

Store and display essential PPE and help ensure all personnel and visitors have instant access to mandatory personal protective equipment.

Each station includes strong black polypropylene hooks from which to hang the relevant personal protective equipment, helping keep it safely stored in a prominent position. Customised versions are available upon request.

Prevent unauthorised vehicles from parking in spaces specifically reserved for the charging of electric vehicles and raise awareness of the correct use and locations of electric car charging points

Easily identifiable using the official DoT (Department of Transport) symbol but in safety green to highlight the environmental benefits of electric cars

Research revealed that 80% of people in the UK feel safer and are more likely to shop in stores / visit premises with clear, professional COVID-19 signage.

The findings also indicate that stores and brands risk reputational damage from inadequate COVID-19 signage, with 40% of people saying inadequate signage makes them feel the business isn't taking their safety seriously.

Farm Safety Signs

79

Highlight areas where it is vital that dogs are kept on the lead. Ensure that both livestock and pets remain safe by warning members of the public of potential risks.

Additionally using safety signs is necessary to meet legal requirements and protect the landowner from liability if someone is injured on their property.

Report Book Holders

Overcome the frequent issue of books being misplaced by ensuring that important log books are clearly visible and easily accessible with our wall mounted book holder stations.

Stations are pre-drilled for easy mounting and include a printed "missing" message to show when the log book has been removed.

First Aid Station

45

This first aid station ensures that life saving information and equipment is clearly visible at all times and is easy to access in case of an emergency.

The First Aid Station can save time in the event of an emergency by overcoming the frequent issue of first aid boxes being lost or misplaced.

Good to Go Safety

Regular equipment inspections can help identify potential faults before they develop into costly defects and /or hazardous to user welfare.

Using the Good to Go Safety system will help you improve safety, reduce maintenance costs and enable you to comply with the relevant legislation.

Custom Made

Despite the thousands of signs available in this catalogue we appreciate that there will always be a time when you need something unique, branded or designed to specific guidelines. This is where our **Custom Made** options come in handy. When you need something printed on a material such as Rigid Plastic, Self Adhesive Vinyl, Foam Board, Aluminium, PET, Acrylic, Aluminium Composite, Fluted Polypropylene, Synthetic Paper, PVC Banner or Reflective Aluminium navigate to **page 148** where you'll find a variety of options that may suit your needs.

We also provide bespoke versions of the following products:

Free Standing Signs	34	Cover-Up Signs	78	Engraved Tags / Key Fobs	95	RA1 Zintec Signs	109	Site Safety Boards	118
Roller Banners	53	Engraved Signs	92	Projecting Signs	97	Re-Flex Signs	110	Hooped Banners	123
Floor Graphics	66	Vacancy Door Sliders	92	Hazchem Placards	101	Cone Signs	111	Site Saver Signs	126
Scaffolding Roll Tops	77	Custom Composite Signs	92	Verge Signs	104	Traffic Supplementary Text	112	Eyelet Banners	129
Door Screens	78	Acrylic / Aluminium Stand-offs	93	Pavement Car Park Signs	105	Reversible Arrow Sign	115	Document Holders	134

How to Order

Each product within this catalogue has its own unique product code. To help you understand the meaning of our codes, please follow the guidance below:

Step One

Find the sign you require by using the index page, contents page or by simply browsing the catalogue.

Step Two

When you find the sign required, use the material grid (on every double page spread) to find which materials are available for your chosen sign. Materials available are highlighted as BOLD **NUMBERS** at the start of every code.

Step Three

The **LOTOERS** at the end of the code identify the available size options. To help choose the best size for your situation you should also take into account our recommended viewing distances (below) for safety signs.

Step Four

Once you've identified the sign, material and size required, use fold-out price list (or request a copy) to find the price.

Products which begin with 5 are listed on a page-by-page basis.

mm	513'50	99.56
FREIT	29.35	COLUMN TO THE REAL PROPERTY AND ADDRESS OF THE REAL PROPERTY AND A
mm	£12.45	\$8.00 CALLET CALLET
mm	E18.34	E0.89
Jmm Jmm	E21.6	
0mm 0mm	£25.	00.09
mm	1	01 65 00 67 12 65
omo	u / E	243 2363 213.61
som	m	£415 Lam

Code Example

The forklift sign to the right is available in four standard material options '1, 2, 7 & 8' you can refer to pages 4 - 5 for more detailed material information.

The unique design code is '3407'

Each letter identifies an available size option for the sign. **SQUARE** letters represent

landscape orientations. **GORGOGS** represent portrait orientations.

5 codes refer to products with miscellaneous materials / sizes and therefore have the details required beside the code. (e.g. Floor Graphic 400 x 600mm)

If the sign you require doesn't come in the material / size you're after, don't worry we can manufacture any design to your exact specifications.

1 3407 **GM&P** 2 3407 G(S 7 3407 😧 8 3407

Floor Graphic 400 x 600mm **5** 8737

Size Codes **Design Code Material Codes**

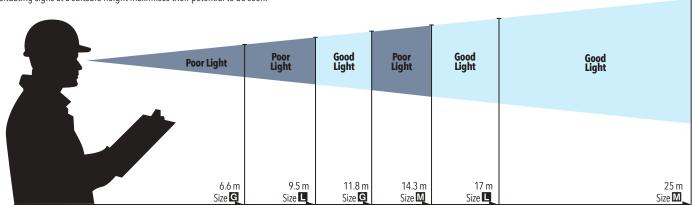

5 Series

Viewing Distances

There are many factors that can influence a person's ability to view a sign, all of which are covered in depth by BS ISO 3864-1, these factors should be considered when deciding on your choice of sign size. The maximum distance a person will be required to view the sign, the angle they are viewing the sign from, lighting, and vision impairment can all have significant influences on the ability to read and comprehend a safety sign.

It is also worth considering the room layout to ensure signs are not obscured by furnishings.

Situating signs at a suitable height maximises their potential to be seen.

These distances are for guidance purposes only. Please refer to BS ISO 3864-1:2011 for specific calculations.

The example above shows an estimate viewing distance for three of our most popular sign sizes depending on conditions of light.

Printing Processes

We have several printing processes which we use regularly. The choice is dependent upon volume, sign environment or content. Below are some of our more popular options:

Screen Print

This method is used for printing the majority of the safety signs within our catalogue. It ensures a high quality print, consistency of colour and a flawless finish.

Digital Print

This method of printing is ideal for short production runs, custom designs or signs that require full colour images to be included. We are able to digitally print directly onto a wide range of materials.

Engraving

Precision routing from computer generated designs provide a tactile, prestigious finish to a sign. The use of layered substrate materials allows the top surface to be cut away to uncover the coloured lower layer.

Vinyl Graphics

Computer cut vinyl graphics can be applied to a substrate (such as Rigid Plastic, Aluminium etc) or pre-cut, ready to apply vinyl lettering or graphics can be applied directly to almost any flat, dry and clean surface.

Custom Signs

If you cannot find the message, size or material that you require then give us a call and, wherever possible, we will be happy to quote for anything outside our standard range.

Whether it's for a prestigious hotel or an after school club, our custom made signs allow you to get creative and provide a truly unique signage solution. Once you know how you want your sign to look, simply follow the steps below to begin the process of creating a bespoke sign.

1. Sketch & Snap / Scan

Mock up your desired sign, take a picture of it on your phone and send it to us via email. Please don't worry if you're not artistically inclined just remember to include material, colour, text and sizes.

2. Snap & Email

If you've seen a sign you require simply take a photo of it on your phone and send us the picture. We'll then mock up the design based on your instructions and send you a proof to approve, following receipt of your order.

3. Send a Link

Price

300 x 250mm	2400 x 1200mm			

Image & Logos

Please ensure all images / logos you send are high resolution to acheive a quality print finish. A high resolution file JPEG, PDF, EPS or Ai file of your company logo is ideal. **Taking a logo from a home page of a website will not do.** Low-resolution images are the main reason for slow production of custom specials. Have your logo ready prior to order to ensure quick order turnaround.

If you are finding it difficult to find a high-resolution version of your logo you can sometimes find it via **images.google.com** simply drag your low-resolution logo file into the search bar and Google will search the internet for images that are similar. If there are any higher resolution logos found on the internet they will load. If all else fails we can reproduce your logo so it prints correctly - additional charges will apply.

Material Information

The first number you see on our product codes identifies the material the sign is made from, an overview of which can be found in this section. Deciding on your sign message is only the first step. When ordering a sign thought should also be given to where that sign is going to be displayed. Consider the environment it will be located within – is it indoor or outdoor? Is it for display in a warehouse or a prestige hotel? Our guide below will help you to decide which material is best for your location and covers our most popular sign materials – this list is not exhaustive so if you can't see the material you require please contact our sales team and we will be happy to quote in a material of your choice.

1. Rigid Plastic

Easily drilled, white, glossy, rigid plastic. A lightweight material with high impact strength, suitable for indoor and outdoor use. Rigid Plastic is the main material used for Quick Fix signs.

2. Self Adhesive Vinyl

High gloss, flexible PVC with self adhesive backing. Suitable for most smooth, dry and clean surfaces. Ideally suited for indoor use such as warehouse labelling.

6. Aluminium

Aluminium with gloss white powder coating. Ideal for both indoor and outdoor applications. Excellent weathering and UV resistance. A long-life product.

7 DET

2mm Thermoplastic Polyester (known as PET) is high quality, recyclable, durable, impact, fire and vandal resistant which makes it ideal for harsher environments.

8. Quick Fix

A white rigid plastic surface provides a durable finish, whilst a strong self adhesive backing removes the need for drilling, screws or additional fixings.

5. Miscellaneous Material Information

Any product outside of our standard choice of material or size ranges begins with a 5. This may include items such as rolls of tape, sign frames, banners, or any sign requiring bespoke designs. It may include products using (but not limited to) the following materials:

PVC Banner

Flame resistant, 440gsm PVC banner for indoor and outdoor applications. Digitally printed for eye catching displays.

Fluted Polypropylene (4mm)

Lightweight, waterproof, strong and 100% recyclable (Class PP5) making it ideal for temporary signage such as site safety signs.

Synthetic Paper

110gsm high density polyethylene. A highly durable, recyclable, tear, water and grease resistant material which is ideal for eye catching posters.

ڒؽؙ

Foam PVC

Available in 3mm, 5mm or 10mm. Bright white, lightweight & waterproof. Easily drilled for fixing. Ideal for outdoor site safety boards.

Acrylic (5mm)

High quality, non-shatter, cast acrylic with a good resistance to weather, discolouring and most chemicals. 100% recyclable.

Aluminium Composite

3mm white aluminium skin with a polyethylene core. A lightweight and weather resistant material which is ideal for outdoor signage due to its non existant scrappage value.

Reflective

Available on various materials (aluminium, zintec & aluminium composite) with a choice of reflective finishes. RA1 reflective (engineering grade) for temporary traffic signs. R2 reflective (high intensity) for permanent traffic signs (CE marked).

Braille & Tactile

2-ply ABS thermoplastic material for both indoor and outdoor use. It offers a durable, scratch resistant, glossy surface. Available in various colours and surface finishes. Laser and routing capabilities offer a high quality finish.

3. Photoluminescent Rigid Plastic

4. Photoluminescent Self Adhesive Vinyl

Photoluminescent signs, tapes and markers work by storing energy from either a natural or artificial light source. If the light source is no longer available in the case of a blackout due to a fire or other emergency, then the "charge" in the sign releases light in the form of protons to produce a greenish luminant glow, also known as phosphorescence. The strength and quality of this glow can vary greatly between manufacturers and for this reason we have introduced the Ultra Bright brand to give assurance that all our photoluminescent signage exceeds PSPA (The Photoluminescent Safety Products Association) Class C ratings, making it one of the best in the UK market and ensuring our signs stay brighter for longer to give the maximum chance for a

Photoluminescent signage is charged by light which allows it to glow in the dark if there is a sudden loss of light due to a power outage or if thick smoke from a fire is obstructing vision. Using this type of signage in a building can assist employees or members of the public to a safe refuge area away from the danger.

Ensuring that signage is clearly visible in blackout conditions can prove the difference between life and death during an emergency evacuation, helping guide people to exits and to essential equipment. The real beauty of photoluminescent products, in the context of a Safety Way Guidance System, is that they do not need electricity to glow in the dark if properly sited and maintained. In an emergency situation where a mains failure has occurred, they will immediately light the way to safety even in smoky conditions.

All Safety Way Guidance Systems (SWGS) must conform to the standards set out in BS ISO 16069. This stipulates requirements that need to be met with regard to the design, installation and performance for both photoluminescent and electrical SWGS. The benefit of these systems is that they are coherent and understood by all, regardless of culture or language. Occupants within your premises can be guided safely out of the building to a designated assembly/refuge point, in the event of an emergency. This is ensured as symbols on the signs must be compliant with BS EN 7010 and sign design must meet the requirements of BS ISO 3864 parts 1-4, to conform to BS

To achieve high performance in low light conditions and conform to ISO 16069 we recommend using Ultra Bright. Ultra Bright range exceeds Class C and the table below indicates how Ultra Bright stays brighter for longer in comparison to PSPA classifications, with our signage remaining visible even after an hour in darkness.

Specifications & Benefits:

- 1. Exceeds Class C photoluminescent PSPA rating
- 2. Afterglow testing in accordance with DIN 67510-Pt1
- 3. Compliant with ISO 16069:2017 Safety way guidance systems (SWGS)
- Maximises visibility of signs during smoky / black-out conditions. Provides clear guidance to exits and emergency equipment which helps significantly reduce evacuation times
- 5. Self re-chargeable and maintenance free No power source / batteries required
- 6. Instant and long lasting visibility of signage in blackout conditions. It takes over 48 hours to totally fade from fully charged
- 7. Cost effective and easy to install
- 8. Non-toxic or radioactive pigments (REACH / RoHS compliant)

Luminance mcd/m2	2min	10min	30min	60min
Class A	108	25	7	3
Class B	210	50	15	7
Class C	690	140	45	20
Ultra Bright	957	199	59	26

The classification system is calculated on luminance decay after a given time which complies to ISO 17398:2004, ISO 16069:2017 and DIN 67510-Pt1

Ultra Bright Rigid Plastic

1.2mm rigid plastic with photo luminescent pigmentation

Ultra Bright Self Adhesive Vinyl

0.35mm flexible self adhesive vinyl with photo luminescent pigmentation.

Recyclable Materials

We firmly believe in, and are committed to monitoring and improving environmental performance, pollution prevention and environmental protection during the manufacture of our safety signage. We implement a systematic waste minimisation programme to achieve objectives and targets to reduce waste, avoiding the use of terminal waste treatment and dealing with it as far as possible at source.

We pursue continuous improvement in environmental performance, where reasonably practicable, by setting objectives and targets, especially in addressing the areas of resource use, by reducing energy and water consumption, increasing reuse and recycling and improving solid and liquid waste management methods.

To help our customers identify which of our signage materials can be recycled, we have included the recycling logo on pages where signs can be recycled and have dedicated a section to some of our more popular signs in eco-friendly materials.

In addition, to help encourage an environmentally friendly approach to signage we now include the appropriate recycling logo on the sign to help identify when a sign can be recycled and to help recycling centres correctly identify and process the materials efficiently without the need to send them into landfill.

Although we only offer this feature on our two main recyclable materials, our acrylic and aluminium signs are also suitable for recycling.

С

G

With so many eco-friendly materials available, we're extremely happy and proud to provide more opportunities than ever for customers to take an eco-friendly choice when buying their safety signage.

Thermoplastic Polyester, known as PET is appropriately marked with the number one and acronym PET. This plastic is easily recyclable so it's often part of curb-side recycling programs. It can be reused to make containers, carpet, and furniture.

PET signs are ultra durable, impact, fire and vandal resistant making them ideal for harsher environments. High quality finish.

Fluted Polypropylene

(Fluted) Polypropylene Plastic, known as PP, is appropriately marked by the number five and the acronym PP. This is one of the safer types of plastic making it ideal for ketchup and medicine bottles. It is also increasingly being accepted in curb-side recycling programs.

Fluted polypropylene signs are strong, lightweight and waterproof making them perfect for temporary installations.

We have access to many more alternative "green" materials so if you have a specific requirement please let us know and we will endeavour to provide the perfect solution to meet your specification.

Fire Extinguisher Identification

The Regulatory Reform (Fire Safety) Order 2005 places responsibility of fire safety on employers to ensure that a fire risk assessment has been conducted to establish fire risks and that appropriate actions are taken to reduce them. Failure to comply could lead to severe legal penalties. Under the Regulatory Reform (Fire Safety) Order 2005, any non-automatic fire fighting equipment should be positioned and signed in accordance with BS EN ISO 7010:2020- to ensure maximum levels of comprehension. By positioning an appropriate fire equipment sign at a height between 1.7m - 2m from the floor it helps to locate and identify essential fire equipment in the event of it being obscured by furnishings in the room.

Tamper Proof Tag

Tamper proof tags can be attached to fire extinguishers or first aid kits, quickly and easily to ensure that the contents inside are kept safe. The tags deter misuse but also offer easy access in case of an emergency. Once broken, the tag cannot be re-closed which helps to identify unauthorised use. The bright yellow design ensures it's easily seen.

Extinguisher Inspection Tags

Monthly inspection of all fire extinguishers should be completed as per BS5306.

Attach one of these single sided inspection tags to a fire extinguisher to display findings and to remind employees to complete monthly fire extinguisher checks. Having a visual reminder on each extinguisher enables employees to quickly view when the item was last inspected.

Fire Door Signs

Every fire door should have a "Fire door Keep shut" sign fitted. When doors can be used from both sides a sign is required on both sides. Doors that open on to a fire escape corridor should be locked shut and signed accordingly. The window stickers are all double sided and designed for use on glass doors. They ensure the message is visible from both directions.

Directional Emergency Escape Signs

Emergency escape signs are designed to guide you from wherever you are in a building, via a place of relative safety (the escape route) to the place of ultimate safety (the assembly area). It must not be assumed that everyone will know all safe routes through the building. Emergency escape signs should comply with BS EN ISO 7010:2020 to ensure maximum levels of understanding. The old EC Directive (92/58/EEC) designs should no longer be used due to their low comprehension credentials.

We have a range of emergency escape signs available in photoluminescent materials (signs which start with a 3 or 4).

The strength and quality of photoluminescent materials can vary greatly between manufacturers and for this reason we have introduced the Ultra Bright brand to give assurance that all our photoluminescent signage exceeds PSPA (The Photoluminescent Safety Products Association) Class C ratings, making it one of the best in the UK market and ensuring our signs stay brighter for longer to give the maximum chance for a successful evacuation (see page 5 for details).

Ensuring that signage is clearly visible in blackout conditions can prove the difference between life and death during an emergency evacuation, helping guide people to exits and to essential equipment in an emergency situation where a mains failure has occurred. Ultra Bright signs will help lead the way to safety even in smoky conditions.

Stairway, Floor Level & Dwelling ID Signs

To assist the fire and rescue service in identifying each level of a building, storey identification signs identify the level by "Floor Number" and should be located on every landing of a fire-fighting stairway and every fire-fighting lobby (or open access balcony) into which a fire-fighting lift discharges. Storey ID signs should be supplemented by dwelling indicator signs (positioned directly below the Storey ID sign), which provide information as to the dwellings (flats or maisonettes) located on the storey in question.

Intermediate Markers

ISO 16069:2017 describes the principles governing the design and marking for Safety Way Guidance Systems. In addition to the requirement for installing exit signs at 1.7m - 2.2 metres from the ground, this standard recommends that additional intermediate and low location markings may also be required. Position at a maximum height of 400mm from the floor for low level marking. Subject to a full risk assessment, additional escape guidance should be provided through the use of both continuous guidance lines and safety signs to ensure there is an uninterrupted safety sign system to aid an efficient and safe evacuation from a building. Fire fighting equipment, hazards along an escape route, boundaries, stairs and ramps should also be identified.

a fire evacuation. Ideal for built up areas where there is no fixed assembly point such as city centres. Collapsible pole enables easy storage until required.

Aluminium 450 x 600mm 2.4m Pole Collapsible **5** 2123

Evacuation Procedures: Choosing an Assembly Point.

Fire assembly points should be far enough away from the building to avoid interference with the fire brigade and danger from falling debris caused by the fire. Providing clear and visible signage will help ensure all evacuees know where to gather in the event of a fire or fire drill. They must be easily accessible and have an unobstructed pathway leading to them. Larger sites may require multiple assembly points that can be identified with allocated numbers/letters.

Designated Smoking Area Signs

Whilst we actively endorse and, wherever possible, adhere to the relevant Standards, we feel in this specific instance signs permitting smoking should under no circumstance be deemed as "safe" (Under BS EN ISO 7010 and BS 5499 signs relating to Designated Smoking Areas are deemed as "Safe Condition" signs. Safe Condition signs would normally use white text on a green background, alongside a tick or appropriate symbol). In acknowledgement of the damaging effects of smoking, please note our range of signs utilise the colour black to clearly differentiate these signs from Safe Condition signs.

No Smoking Regulations

The Smoke-free (Signs) Regulations 2012 state that at least one legible no smoking sign is displayed in smoke free premises.

England and Northern Ireland: You must display signs at each public entrance to any work or public place. Signs should also be displayed in public / business vehicles.

Wales: Any work or public area must display the 'Law' sign at each entrance. General, dual language 'No smoking' signs should also be on display in public and business vehicles.

Scotland: Signs should be displayed at each public entrance to any work or public place. Signs should also be displayed in public / business vehicles.

Harmful Substances

Displayed to advise and forewarn of potential dangers. These signs should include a yellow triangle with black border containing a warning symbol conforming to ISO 7010.

The signs' supplementary text should always include one of three words:- Danger - High level risk that could result in death or serious injury. This keyword should be limited to the most extreme hazard cases. Warning - Medium level risk that could result in minor or moderate injury. Caution - Low level risk that could lead to minor injury.

PAT Testing

Portable Appliance Testing is the name of a process in which electrical appliances are routinely checked for safety. The formal term for the process is in-service inspection and testing of electrical equipment. PAT Test labels should comply with IEE regulations, ensuring all required information is on the label.

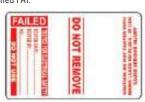

Cable Wrap Labels

A roll of 100 cable wrap labels manufactured from a matt non-rip material that can be written on with a standard pen. The label wraps around the cable to identify if the appliance has passed or failed PAT.

75 x 50mm **5** 4043

Permit to Work - Electrical Works

They include risk assessment and sign-off to ensure that only competent employees are working on electrical works.

Permits contain 3 parts (original, plus two carbon copies for management records) with a card backing in the form of an A4 sign.

An integral part of any Health and Safety Management System.

5 8171

Electricity Posters

Provide staff with guidance on the potential hazards of electricity and what actions should be taken to minimise risk with these informative safety posters.

Posters and Frames

For our full range of posters and frames see pages 44 - 53.

Arc Flash

An arc flash is an explosive release of energy that includes brilliant light, dangerous sound levels and sometimes a blast pressure wave. It is primarily caused by an electrical short circuit or overvoltage between live conductors or live conductor and earth. Where the flash results in a blast, explosive noise and shrapnel can accompany it. Isolating the supply of electricity and using appropriate PPE are popular methods for reducing the risk of an arc flash, as is the use of appropriate signage to highlight the inherent dangers.

Free Standing Signs

Polypropylene - 300 x 600mm - Double Sided Warning - Foldable, Waterproof, Durable and Compact

Lightweight Free Standing Signs

These popular double sided, free-standing signs can be customised and personalised to show the warning message you require. They can also be used to promote brand awareness while you work – add your company name and contact details to ensure potential customers know who to contact if they want similar work completed.

To customise these signs in any way simply quote the relevant code and supply the wording/message or image that you require when ordering.

Choose your design and include up to ten words on both sides.

Elevator Guard

Designed specifically for elevator maintenance and to comply with BS EN 7255:2001.

Complete modular, 2-panel units that can link together to form larger units. Fold away barrier system made from durable polyethylene plastic. Non-conductive, telescopic poles stored inside the barriers to connect to elevator opening. Lightweight yet extremely strong.

- Suitable for 1300mm openings
- No admittance authorised personnel only
- Each panel 1100 x 660 x 40mm (H x W x D)
- Weight: approx 4kg
- Telescopic poles extend to 2.2m

Polyethylene 1100 x 660 x 40mm Panels x 2

5 9638

Cone Attachments

This lightweight ring fits onto round cones; complete with hooks for plastic chain attachment. Use to create a simple barrier solution.

Lightweight polyethylene chain with 6mm links. Supplied in 10 metre lengths.

Red & White Black & Yellow

5 9041

For chain posts and additional barrier systems see pages 70 and 71

Handi Guards

High quality modular, 3-panel barrier system with a yellow and black stripe and caution symbol as standard. A smooth finish allows easy maintenance and cleaning. Snap on hinges supplied with every panel or set to link panels together.

- Dimensions: 800 x 1000 x 30mm (H x W x D)
- · Foldaway for easy storage
- Lightweight panel weight 2.5kg
- Made from durable polyethylene
- Designed to comply with BS7801:2011 safe working on escalators and moving walkways

Personal Protective Equipment (PPE) Signs

Employers are responsible for the provision and use of personal protective equipment (PPE) at work. PPE is equipment that will protect the user against health or safety risks at work, it can include items such as safety helmets, gloves, eye protection, high-visibility clothing, safety footwear, safety harnesses and respiratory protective equipment (RPE).

PPE must be properly looked after and stored when not in use. Employees must make proper use of PPE and report if it has been lost, damaged or if any fault is found. Safety signs and posters can prove a useful reminder that PPE should be worn during specific tasks or in specific locations. Take note of any changes in equipment, materials or methods - you may need to update your signs accordingly.

Noise Activated Sign

A highly visible noise activated sign for use where there's a need to indicate when a preset noise level is reached. A great solution where noise levels are intermittent such as factories or music venues.

- · Lights up when a preset level is exceeded.
- Quick and simple to install: Wall mount and connect to mains via 5m cable.
- Trigger level: 40dB(A) to 114dB(A) for use in any environment.
- High intensity white LED for high visual impact and a long operating life.

First Aid Projecting Signs

This range of first aid projecting signs enables the first aiders' to identify locations of First Aid equipment from several view points quickly and easily. These projecting signs have been designed to conceal the fixings for a neat finish and are supplied ready to install with an easy drilling guide.

First Aid Box Tamper Labels

An easy-break label to clearly identify when a first aid box has been opened. Helps ensure first aid box remains fully stocked.

Roll of 50

Reflective First Aid Armband

Identify first aid personnel quickly with this reflective first aid armband. Hook and loop fastening. One size fits all.

Adjustable to fit: 90 - 130mm diameter. 5 6469

First Aid Box Tamper Tag

Tamper proof tags can be attached to first aid kits or fire extinguishers, quickly and easily to ensure that the contents inside are kept safe and deters misuse but it also offers easy access in case of an emergency. Once broken, the tag cannot be re-closed which helps to identify any case of unauthorised use. The bright yellow design ensures it is easily seen.

300mm Length

Wall Hanging Hook

Manufactured from a strong black polypropylene plastic. Suitable for holding most first aid kits by the handle. The hook includes two drill holes for easy fixing (screws not included). Helps to make first aid kits easily visible and accessible in the workplace. 55 x 60 x 80mm

First Aider Hi-Vis PPE Station

Store and display your hi-vis first aider waist coat and $\ensuremath{/}$ or armband on this handy PPE station.

Provide instant access to PPE in the event of an emergency situation and ensure everybody knows that you are the qualified first aider at the scene.

The Foam Board is easily drilled for wall mounting.

A strong black polypropylene hook from which to hang the relevant PPF (PPF not included)

10mm Foam Board 80 x 160mm **5** 5936

To view the full range of PPE stations go to page 72. Customised versions are available upon request.

First Aid Station

Locate essential information and equipment in one place, this First Aid Station can save time in the event of an emergency.

Includes

General advice covering treatment of common injuries and emergencies.

First aid box holder to hang your first aid kit (not included) which displays a "missing" message if the box is not in place

First aiders notice to help identify those trained to administer first aid

Accident report book holder and A4, GDPR compliant report book which includes 50 accident/report forms

10mm Foam Board 900 x 700mm

Accident Report Book

50 individual records, all on perforated paper to enable confidentiality.

In line with the Data Protection Act 2018 and GDPR, this A4 book enables the record of an accident/incident relating to any individual to be easily removed from the main book and stored securely in an employee's private records.

5 6095

Accident Report Book Station

This wall mounted station ensures that the accident book is clearly visible at all times and is easy to access in case of an emergency. The station helps to overcome the frequent issue of Accidents Books being misplaced or not close to hand following an accident and therefore a record not being completed.

The station is pre-drilled for easy mounting and includes a printed "missing" message to show if / when the log book has been removed.

Health and Safety Law Poster

The HSE Health and Safety Law Poster includes enhanced security features. The features include an image flip hologram with surface relief, optical variable ink, embossed roundel, rounded corners and is printed on recyclable polypropylene material.

Easy to read and understand, providing benefits from

increased awareness to both workers and employers. Unlike

the previous poster, there is no need to provide the name and address of the enforcing authority for the premises.

Reduces the administrative costs for employers, who no longer need to include and update additional information.

Magnetic Frames

A quick and easy solution for displaying key information in the workplace.

These magnetic document frames are available for both A4 (210 x 297mm) and A3 (297 x 420mm) sheets of paper. The frames are available in various coloured borders making them perfect for use in the workplace to display all types of literature, certificates and information.

For more information see page 60.

NO DELIVERIES TO BE ACCEPTED DURING WICE OF DUE TO STOCK TAKING.

Adapt-a-Sign Frames

Use blank frames to display your own messages. Simply print off your message on a standard A4 piece of paper and update messages accordingly.

Pre-printed frames available on page 88.

Roller Banners

Roller Banners are the ideal choice for creating a free standing display quickly and easily. The graphic is protected inside the roller cartridge when the stand is not in use and a carry case is provided for easy transportation.

Create your own promotional roller banner for use at exhibitions, trade shops or for in-store point of sale. Simply supply high resolution artwork when ordering or call us for assistance.

Multi-Message Design Rules

Multi-message signs can be used to display several safety messages on one sign, consolidating important information into a single focal point and removing the risk of sign clutter. Different safety sign categories can be placed together vertically or horizontally on the same sign. The sign should never combine two categories into one message. Multi-message signs should follow the design principles of BS EN ISO 7010:2020 to ensure maximum levels of message comprehension.

Rack Protector

A cost effective protective bumper which minimises the impact of forklift collisions. Supplied with two velcro straps (700mm) for quick and easy fixing to most uprights

- Polyethylene no rusting or denting
- Waterproof and chemical resistant
- Ability to reform itself after an impact
- Slim fit provides minimal aisle intrusion Manufactured to comply with BS6399-1: 1996

Clips to any frame width between 75-90mm - Height: 500mm

5 9235

Racking Sack

Made from tough waterproof polyester, this racking sack can adequately withstand the rigours of industrial environments.

The re-usable waste sack helps promote a clean and tidy work place and is suitable for racking systems between 900-1100mm deep.

Quickly fixed / removed to the end of racking by using the hooks provided. When hung it has a large open mouth to easily receive waste, without encroaching into the floor area.

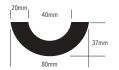

Alternative colours and messages are available upon request.

920 x 1000mm (W x H) **5** 8933

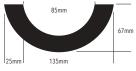

Impact Protection

The impact protection system cushions and warns of protruding corners, edges, vulnerable pipes and protects many other areas such as walls, kerbs, trolley parks, vehicles, plant and machinery and is ideal for racking and shelving. Supplied in standard lengths of 1000mm and manufactured from high-grade flexible age resistant polyurethane foam with self adhesive or push on profiles. Protects staff from injury and property from damage. Can be easily cut to the required length.

Magnetic Document Frames

A quick and easy solution for displaying key information in the workplace. These magnetic document frames are available for both A4 (210 x 297mm) and A3 (297 x 420mm) sheets of paper. The frames are available in various coloured borders making them perfect for use in the workplace to display all types of literature, certificates and information.

The strong magnetic border allows them to be applied to metal filing cabinets, racking, magnetic whiteboards or any other flat steel surface.

Insert a sheet of A4 or A3 paper within the frame to display content. Content can be easily updated as / when required by simply lifting the magnetic strip, this also makes it simple to relocate the frame whenever necessary. Ideal for use in 5S or 6S lean manufacturing displays where colour coded frames may prove beneficial.

The choice of common "safety colour" borders means that the frame can also be coordinated with key safety messages (mandatory, prohibition, warning and safe condition).

Near Miss Reporting

The HSE defines a near miss as 'an event not causing harm, but one that has the potential to cause injury or ill health'. This can include dangerous occurrences that are reportable, as defined in the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013 (RIDDOR).

Near Miss Record Book

This Near Miss Record Book contains clear guidance on what a Near Miss Incident is, the employers and employee's responsibility and guidance on completing a record.

Near miss records are used to inform management of incidents, to help ensure that serious injuries and accidents do not occur in the future.

The perforated top allows forms to be easily removed from the book for safe storage / management records.

A4 Book 53 Incident Forms **5** 5937

Near Miss Record Book Station

A near miss record book is an ideal way to keep track of incidents that had the potential to result in injury, allowing you to improve your health and safety measures and policies in the future. Ensure your employees make good use of the record book by wall-mounting it with this useful station (pre-drilled for easy mounting). A printed "missing" message is displayed on the station and will show when the book has been removed. (Books ordered separately).

3mm Thick Plastic 360 x 220 x 15mm **5** 5938

Near Miss Station

Take a proactive approach to improving site safety and ensure that all near misses and incidents are recorded and acted upon with this near miss station. Includes a suggestion box to store near miss slips.

(Slips sold separately)

10mm Foam PVC 600 x 440mm **5** 6687

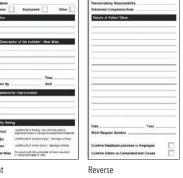

Near Miss Slips

Allow near miss incidents to be recorded and show the actions taken to eliminate repeat occurrences.

Pack of 10 Matt PVC

80 x 150mm

Suggestion Box

Fabricated in yellow polystyrene with a clear acrylic A5 sign holder on the front (insert your message of choice). The pocket behind the holder can be used to store your near miss tags. Sliding door at the rear gives access to remove the contents. The box is freestanding but can also be wall mounted.

Yellow Polystyrene with a Clear Acrylic front W 275 x H 275 x D 100mm with 145mm Wide Slot

Inspection Station

This wall mounted information station provides details of equipment inspection processes whilst offering easy access to inspection check books from a tidy central location.

For more information see page 134.

10mm Foam PVC 700 x 750mm **5** 1335

Equipment Inspections

Good to Go Safety is a multi-award winning system which enables companies to complete safety inspections on workplace equipment.

The system is perfect for ensuring warehouse equipment such as forklifts, ladders and pallet racking are in safe working order prior to use.

Simply attach a status tag to the equipment, use the corresponding check book to carry out an inspection, insert the completed checklist inside the tag. A duplicate carbon copy is created for your management records, providing invaluable evidence of a Safe Equipment Management System (SEMS) in the event of an accident.

For more information see pages 131-135.

Multi-Lingual Signs

Multi-Lingual signs are a useful way to get key safety messages across to employees and the public, within areas known to have a large percentage of people where English may not be their primary language. We are able to supply signs in a wide range of languages, so if you can't find the language or message that you require please contact us for a quote.

Spray Paints

Long lasting, durable synthetic resin paint. Easy to use, simply shake the can, insert into an applicator and apply.

Produces markings that are highly visible and are abrasion and chemical resistant. Adheres to most surfaces - concrete, asphalt, tarmac, metal and tiles.

Economical - one 750ml can produces a 50mm wide line approximately 50-90 metres long (dependent on surface). Environmentally friendly. Conforms to the latest EU regulations.

5 9607 **5** 9605 **5** 9606

Paint Applicators

The hand held applicator is perfect for use with stencils giving you free movement, whilst the 4-wheel applicator is ideal for creating neat, straight lines.

Hand Held Applicator

This hand applicator has been specially designed for comfortable use. Ideal for use with stencil sets. Makes marking steps or obstructions easy.

5 9604

4-Wheel Applicator

This 4 wheel paint applicator produces 50 - 75mm wide line marking of roughly 25 metres per minute.

Minimal assembly is required and the rear wheels are removable to get up close to walls and racking.

Colours can be changed quickly without cleaning the machine.

The four wheel paint applicator produces a 50 - 75mm wide line marking of roughly 25 metres per minute.

This handy kit contains everything you need to

mark out warehouses, factories or car parks.

The long lasting synthetic resin spray paint produces highly visible, chemical resistant marking that adheres to most surfaces such as concrete, asphalt, metal and more.

Additional paint can be ordered if required - if you prefer the kit with an alternative colour please advise.

Pre-Printed Wall Mounted Barrier Messages

Wall mountable retractable barriers with popular messages printed onto the fabric. A very effective system for restricting access with a choice of belt lengths available.

Chain Posts

Plastic posts and chains offer a lightweight, flexible option for cordoning off areas quickly and easily, making them perfect for temporary hazards such as spillages or for preventing access to areas during cleaning or hazardous work activities. The posts and bases are easily detached for ease of storage.

Universal Chain Post & Base

An ideal, low cost solution for cordoning off areas both internally and temporarily in outdoor environments. Quickly and easily deployed.

Use with plastic chains and chain links below (sold separately).

We recommend a maximum of two metres of plastic chain between posts.

- Corrosion proof plastic construction
- Four chain eyes in cap allows easy directional changes
- Highly visible post colours

Shadow Boards

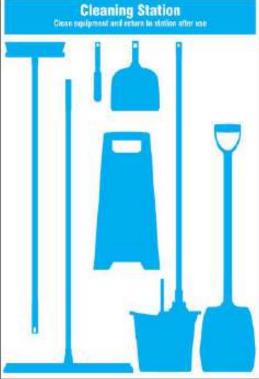

A Shadow Board is a great addition to any 5S / 6S system, acting as a locator for tools and equipment. The shadow board allows the easy recognition of missing items and helps to ensure everything is stored correctly. Each shadow board is marked for accurate attachment of hooks, hangers and rails.

There are many important benefits derived from using a shadow board system such as: **1.** Systematic storage in an organised manner - makes it easy to locate items when needed, **2.** Improved productivity due to the ease of locating required tools, **3.** Accountability - with each area responsible for their workstation, missing items are quickly identified, 4. Space utilisation is improved by keeping everything stored neatly in one easy to reach location.

All stations on this page are supplied complete with contents listed.

- **4 Piece Station** 10mm Foam 750 x 1800mm
- 1 x Squeegee 1 x 12L Bucket

We can make bespoke shadow boards that include any configuration of our range of cleaning equipment. Both the shadow boards and equipment come in a range of colours. Contact us for more information.

6S Safety Signs

6S is a system for organising spaces so work can be performed efficiently, effectively and safely. This system focuses on putting everything where it belongs and keeping the workplace clean and tidy, which makes it easier for people to do their jobs without wasting time or risking injury.

A neat and tidy workplace will see higher productivity; produce fewer errors/defects; meet deadlines better; be a safer place to work; identify problems earlier; promote stronger communication levels; reduce waste and lower costs. Our range of signs and posters help to promote the importance of 6S.

Spill Kit Station Signs

Regulation 13 of the Control Of Substances Hazardous to Health Regulations 2002 places a duty on employers to provide for appropriate emergency response including immediate remedial action. EN ISO 14001 requires organisations to "establish and maintain procedures to identify potential for and respond to accidents and emergency situations, and for preventing and mitigating the environmental impact that may be associated with them" (Clause 4.4.7).

Our range of signs inform how to effectively respond to any oil, chemical or general fluid spill on site, inline with EU guidelines and legislation to assist with ISO 14001 compliance.

Hazardous Substance Warnings

Suppliers of dangerous goods are required by law to label their products with hazard symbols and safety advice. GHS symbols have been developed so that people handling hazardous goods know the nature of the hazard they present. For our full range of Hazard Warning Labels and Posters see pages 98-101.

Recycling Signs

An extensive range of recycling signage to ensure your workplace identifies bins and areas dedicated to your recycling programme. Waste & Resources Action Programme compliant.

The aim of the WRAP programme is to help businesses, local authorities, community groups and individuals recycle and reuse more, and to reduce food waste. If you can't find the sign you need for your businesses' recycling programme let us know and we will be happy to quote for custom designs.

Door Screen Signs

Door Screen Safety Signs offer an innovative solution to warn people of potential hazards and prevent access by fitting a barrier with the appropriate message across a doorway.

- 600 x 450mm flexible PVC sign
- Rubber end caps for maximum grip
- Wipes clean and rolls away for easy storage
- Spring loaded poles (710 to 1010mm to fit most single doorways)
- Warning message prevents access and warns of hazards
- An excellent temporary barrier to prevent access during cleaning or repairs.

Cover up Signs

The Cover-Up Sign provides a clear barrier to faulty equipment such as toilets, vending machines and office equipment. A clear visual message warns of the fault whilst the sign itself provides a physical barrier. Assembled in seconds, using hook and loop fixings. Simply collapse the Cover-Up sign when it is no longer required and store until the next use.

- Floor or wall mounted, wipe-clean material
- Collapsible and reusable for easy storage
- Provides a clear message and physical barrier
- Strong, lightweight and waterproof
- Offers a professional looking solution for short-term maintenance issues

880 x 430 x 350mm Fluted Polypropylene Supplied with suction cups for wall fixing

Private Land and Farming Signs

Did you know that farming is statistically the most dangerous industry in the UK? Using the right farm safety signs is necessary to meet legal requirements and protect the landowner from liability if someone is injured on their property, so it's vital to properly display farm signs where required.

Tractor Inspections

The most common causes of serious and fatal injuries in agriculture involve farm vehicles and machinery. To comply with legislation, you should carry out daily checks to make sure the machinery you are about to use, or allow someone else to use, is safe and working correctly. Keeping a record of when an inspection has been carried out is important, they can help show that a tractor is well maintained and regularly checked, proving invaluable in the event of an HSE inspection following an accident. See page 131 - 135 for more information.

CCTV Safety Signs

If your business uses CCTV, you must inform people that they could be recorded. This is usually done by displaying signs, which must be clearly visible and readable. In order to comply with the Data Protection Act 1998, signs must state the purpose of the scheme, and give details of the Data Protection Act Controller (either the person's name or position, or preferably the company's name) together with a contact telephone number or address, if it is not obvious.

Adapt-a-Signs

3mm PVC, with a hard wearing Clear PVC cover - 215 x 310mm.

A cost effective sign solution, allowing you to adapt the sign to manage any changes in personnel or company details. Helps ensure your signs remain up to date at all times. Developed to hold a standard A4 sheet of paper, which you can simply print off with your relevant contact details and insert into the sign frame.

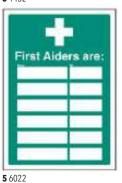

Your fire wardens **5** 1037

5 5436

5 1108

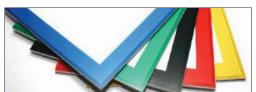

Spill kit located at:

Blank Adapt-a-Sign Frames

Use blank frames to display your own messages. Perfect for displaying escape route plans, information messages or an ideal solution for use in care homes or for anyone living with dementia. It allows you to print a photo of the actual room they are familiar with and recognise rather than displaying a generic door sign that may not be of help. You can also add a photo of the person to help them identify their bedroom etc.

Benefits of the Adapt-a-Sign System

Scoring out a persons name and scrawling a new one underneath it is unprofessional and unsightly, but equally, buying a new sign each time there are personnel changes seems wasteful.

The Adapt-a-Signs system gets rid of unsightly scribbles and unneccessary wastage by enabling a A4 print out to be inserted into the sign to show new personnel instead.

1. Replace your existing messy signage with a adapt-a-sign

2. Type up personnel details

3. Print out on A4 page

4. Insert printout into Adapt-a-Sign

5. Replace when details change

Once you have an Adapt-a-Sign in place, the next time there are personnel changes you can simply repeat steps 2-4 which saves time, money and removes confusion.

Need a Custom Adapt-a-Sign?

Braille & Tactile Signs 1.5mm 2-Ply PVC with Self Adhesive Backing

Our braille and tactile signs are manufactured to conform with the DDA Act 1995 and the Equality Act 2010. This legislation requires companies to provide all people equal access to public buildings, as well as to anyone providing a service to the public. Organisations must make "reasonable adjustments", one of which is providing large, well defined braille signs for visually impaired people.

Our braille and tactile signs come with a self adhesive back and are a durable, easy to install, scratch resistant PVC and suitable for internal use. Available in various colours and surface finishes. Laser and routing capabilities offer a high quality finish. Raised letters, symbols and braille help ensure people with visual impairment can read important messages. No need for additional signs as our braille / tactile range can be read by everyone.

Why both Braille & Tactile?

Fewer than 1% of the two million visually impaired people in the UK are users of Braille. Many people lose their sight when they are older and may never learn Braille, but they know how to recognise letters by their shape. For these people, the transition of learning to read tactile letters on a sign, is much easier than learning the new coding of Braille. Therefore BOTH tactile and Braille are key elements in helping the visually impaired to read and understand important signage messages.

Deluxe Signs

Sometimes a standard sign is not enough and the location requires something a little more elegant. Our deluxe range offers a choice of finishes to help your signs stand out from the crowd.

Acrylic Visual Impact Door Signs

Stand-offs give your signs extra visual impact as they stand out from the wall or door. Acrylic materials provide a contemporary appearance which is perfect for hotels, retail and high profile establishments. If you can't find the message you are looking for then use the code 5 9688 to create your own.

5 9186

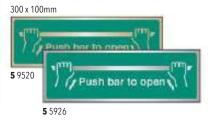

Aluminium or Brass Effect Alternatives

We also offer a more economical option using aluminium or brass effect composite materials - see page 92 for available options.

Engraved

Our range of engraved products are supplied on a 2-ply 1.5mm rigid PVC laminate. This material is heat-resistant and robust to withstand the toughest of environments, making them a cost effective and practical solution for many industrial applications. Engraved signs and tags provide a permanent and effective message, removing the risk of print being scratched or damaged during general cleaning and maintenance. If you can't find the size or shape that you require please contact us for a quote.

Engraved Valve Tags

Pack of 50 - 1.5mm 2 Ply PVC Engraved Valve Tags

Our valve tags are engraved to give better quality than printed, stamped or punched alternatives. The tags are drilled at the top centre allowing you to fix to a ball chain or split ring.

Each pack contains fifty sequential numbers. Please specify the number range required (eg. 1-50)

Numbered with Prefix

Each pack contains fifty sequential numbers with prefix lettering. Please specify the number range and prefix you require (eg. GAS:1-50, T:51-100)

Lock Out Tag Out

The term lock out tag out (LOTO) refers to a safety procedure that ensures that machinery and energy sources are properly shut off and not unexpectedly / accidentally started up before the completion of maintenance or servicing work. These energy sources could include electrical, mechanical, hydraulic, pneumatic, chemical, radiation and thermal hazards. The point of a LOTO procedure is to identify and isolate a hazard that may cause injury if it were to start up or release stored energy during the maintenance process.

Hasps

Isolate a piece of equipment with multiple padlocks.

Six (6mm Dia.) holes on the handle for 6 individual padlocks.

25mm Clearance 5 3313 38mm Clearance 5 3314

Padlocks

Thermoplastic padlocks with a steel shackle. Temperature, chemical and corrosion resistant, UV stable.

Every padlock is supplied with a unique key for maximum security.

For keyed alike versions please cal for a quote. Green **5** 3318

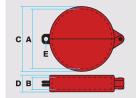

Black **5** 3322

Rotating Gate Valve Cover

Gate valve covers are a simple, low cost and highly effective way to prevent unauthorised operation of valves. Valve covers consist of two flattened half moons that slip over the valves hand wheel and completely cover it. Once locked, the cover rotates freely around the hand wheel preventing operation.

Fits Valve Diameter	A. Inner Diameter	B. Inner Height	C. Outer Diameter	D. Outer Height	E.Lock Hole	Code

Lock Out Tag Out Kit

This Lock Out Kit includes devices for locking off valves and electrical isolators

- 6 x Red Padlocks (Keyed Alike)

- 2 x Lockout Hasps 3 x Adjustable Cable Lockout 1 x 25-76mm Gate Valve Lockout 1 x 50-127mm Gate Valve Lockout
- 1 x 101-165mm Gate Valve Lockout
- 1 x Ball Valve Lockout
- 6 x MCB Lockout (Standard)
- 2 x MCB Lockout (Wide pins)

5 3331

Portable Lockout Box

Mild steel with red polyester powder coating. Includes key drop facility on lid.

12 Padlock Locators (Padlocks not included) Up to 8mm Shackle Dia.

152 x 230 x 95mm Weight: 1.85kg

5 3332

Cable Lock Out

Ideal for use on gate valves or to lockout multiple items. Manufactured from tough thermoplastic with 4mm dia steel cable, vinyl coated. The cable length is 1.8m and the lock out point accepts up to 4 padlocks for multiple lockout applications.

Any slack in the cable can be taken out without the need to remove padlocks

Lock Out Tag Out Stations

Lock Out Stations ensure that LOTO equipment is readily available from a central location. Manufactured from 5mm foam PVC and supplied with contents. The striking black and yellow border ensures that the station is highly visible wherever sited. Corresponding shadow profiles of each item of equipment on the station helps easy inventory checking and highlights when replacements are required.

20 Lockout Station Includes:

20 x Shackle Padlocks (38mm - Red - Keyed Differently)

2 x Hasps (25mm - Red)

80 x Do not Operate Tags

Dimensions: 660 x 520mm

10 Lockout Station Includes:

GHS & COSHH Information

The classification and labelling aspects of CLP/GHS have applied to substances since 1 December 2010 and to mixtures since 1 June 2015. The final deadline fell on 1 June 2017 and applied to mixtures that were already on the market before 1 June 2015 - the transitional period was intended to give suppliers time to either deplete stock that was already on the market or to arrange for re-packaging and re-labelling of goods to be completed before 1 June 2017.

Spill Kit Products

For more spill kit signage and products see page 75 or contact us if you have a bespoke requirement.

Hazardous Substance

The carriage of dangerous goods by road, rail, inland waterway, sea and air is regulated internationally by European agreements, directives and regulations, and parallel legislation in the UK. Dangerous goods are assigned to different classes depending on their hazard. The person or business shipping the goods is responsible for classifying, marking and packaging the dangerous goods. ADR sets out the requirements for the classification, packaging and certification of dangerous goods being transported by road.

As well as the requirements specific to their transportation, suppliers of dangerous goods are required by law to label their products and packaged chemicals with hazard symbols and safety advice. Recognised GHS symbols have been developed so that people handling hazardous goods know the nature of the hazard they present.

GHS is the Globally Harmonised System of classification and labelling of chemicals (sometimes also referred to as CLP). GHS came into effect in 2009, phasing out the old black & orange CHIP designs by June 2015. The aim of the GHS regulation is to create a worldwide recognisable system of chemical classification and labelling.

Speed Restriction Signs

Car parks on private land are managed using the laws of contract or trespass, whilst car parks operated by local councils are generally regulated by law. Typically, a principle sign will be displayed near the entrance to the car park describing who the car park is for, and if there are time or speed limits and details of any charges or free periods that may apply. Additional signage in and around the car park may provide more information relating to height restrictions, traffic flow and any designated parking bays.

Electric Vehicle Parking

Raise awareness of the correct use of electric car charging points - identify location, and prevent unauthorised vehicles from parking in spaces specifically reserved for the charging of electric vehicles. Easily identifiable using the official DoT (Department of Transport) symbol and in green to highlight the benefits to the environment.

Pavement Sign

This eco-friendly, portable, high performance sign is ideal for pavement and forecourt messages and promotions. Manufactured from durable aluminium and recycled plastic. These pavement signs give off a perfect display in all types of weather. It has a large display area of 460 x 820mm on aluminium which is securely locked into the base with a blue wedge. The base provides an excellent ballast and has been tested in winds over 70mph.

Standard product has a single sided display. Contact us for a quote if you require a double sided display. Recycled PVC Base and Aluminium - 465 x 867 x 540mm (W x D x H) - Weight: 8.9kg.

Cone Signs

Reflective Polypropylene - 600 x 450mm Use with 750mm / 1000mm cones (not included)

Custom Cone Sign

Our custom cone sign is an ideal solution for car park or roadside messages.

To customise this sign simply supply the message, logo or any other information required when

Our full range of cone signs are on page 111.

Temporary Speed Bump Signs

This range of signs help to slow traffic to the required speed limit. Display inside a metal sign frame found on page 113.

Bird Deterrent Spikes Pack of 3 Polycarbonate Spikes - 333 x 90mm

Birds often find refuge in parking lots and perching on street lights, creating a mess on the cars and the surrounding area. Bird deterrent spikes are a simple but effective solution to prevent birds from perching and nesting. Manufactured from transparent polycarbonate these spikes are designed to blend in and are rounded so not to harm birds or maintenance personnel. Spikes can be fitted by the use of screws or with double sided weather resistant tape.

Ice Detector Signs

Reduce the risk involved with costly slip and fall accidents on your property by installing our Ice Detector Signs. These Ice Detector signs are a early warning system that can be used in any outdoor area, including car parks, railway stations, depots, roads, hospitals, retail locations, airports, walkways and outdoor workplaces. These signs incorporate a temperature sensitive blue reflector, which gradually revolves into sight when the temperature reaches 2°C and by -1°C is in full view. It requires no power and is virtually maintenance free.

The signage system will lower the personal injury financial risk involved with costly accidents and helps make up part of the employers' Duty of care' charter to their employees. A simple visual indicator of imminent freezing conditions. The Ice Detector Sign has a three stage indication process utilising a temperature sensitive blue reflector, which revolves into place when temperatures start to move below 2°C.

As illustrated on information panel 5 8199, when the temperature is above 2°C, the grey indicator will show that conditions are normal. As the temperature drops, the reflector will transition to show that conditions are becoming colder and the threat of potential freezing conditions are therefore a possibility. When the temperature drops below -1°C then the reflector display will be fully blue.

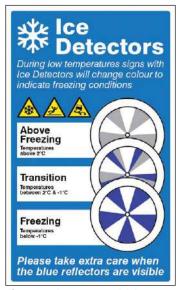

Our signs are manufactured from 3mm thick aluminium composite, making them lightweight and durable. Each sign is equipped with channelling on the rear for post mounting. They should be positioned in a way to ensure they are clearly seen at eye level, to provide the quickest indication of the temperature outside of any building or car parking facility when entering or exiting the building.

RA1 & R2 Traffic Signs

From 1st July 2013, any permanent sign directing traffic as listed in the Traffic handbook must be CE Marked.

This means road traffic signs erected on a public highways need to be manufactured in accordance with the CE Marking Standard. All of our permanent road traffic signs are manufactured in accordance with Chapter 8 & TSRGD guidelines. Our reflective material meets the specification of classes RA1 (for temporary use) and R2 (for permanent siting) under BS EN 12899. All signs on this page are supplied complete with channelling for post mounting.

Permanent road signs must be (CE) marked

All of our R2 reflective signs are supplied complete with CE marking. All our signs are manufactured from 3mm traffic grade Aluminium Composite, a lightweight and weather resistant material ideal for external use. Aluminium Composite has no scrap value and therefore the risk of theft is reduced.

Need a different traffic sign or symbol?

RA1 Zintec Traffic Signs

How well signs are seen dictates how drivers react. That's why the brightness and clarity of signage is so important. Manufactured using engineering grade (Class RA1) reflective sheeting applied on to 20/22 gauge Zintec plate. These traffic management signs are designed for use with road sign frames as shown on page 113.

What is Zintec?

Zintec is a durable, rust resistant steel sheet that is covered in a thin layer of zinc using an electromagnetic process, making it extra strong and providing a smooth finish. As a result Zintec proves a great option for temporary traffic signs when you know they will spend time being stored or transported between use

Fig. 511

Reflective Signs

Available on various materials (aluminium, zintec & aluminium composite) with a choice of reflective finish. RA1 reflective (engineering grade) for temporary traffic signs.

Class	Reflective Material	Material	Usage
RA1	Engineer Grade: Lower reflectivity level sheeting, lower cost	20 / 22 Gauge Zintec Plating or 3mm Traffic: Aluminium Composite	Temporary Traffic Signs
R2	High Intensity Prismatic: Retains a high reflectivity level over time	3mm Traffic Dibond: Aluminium Composite	Permanent Traffic Signs

Re-Flex Frame

A plastic sign frame that is compatible with our pre-drilled Re-Flex Signs. The modular design enables workers to quickly assemble signage on site. The system removes the need for stocking multiple frame shapes and sizes because interchangeable signs can be installed on the same frame.

Four antiluce droplock fasteners make changing signs fast and simple and eliminate the need for wingnuts, road frame clips and other additional small accessories which get lost and / or damaged.

Due to the frame being an all-plastic design it will not conduct electricity, corrode over time and removes the risk of theft for scrap metal. The frame is made using recycled plastic materials and can be recycled at end of life.

Highly resistant to wind: Category C (19 mph) winds without ballast Category B (39 mph) winds with a 9kg weight Ultra-durable sign frame is resistant to cracking Lightweight and stackable 3.3kg design reduces weight and space taken up in works vehicles

Collapsed Frame Dimensions: H 935 x W 800 x D 35mm **5** 7470

Improved Design

Please note:

Chapter 8 Roll-up Sign Kit

A compact, lightweight pack of eight reflective roll-up signs, as required for road works under Chapter 8 of The Traffic Signs Manual. This kit saves space and weight compared to rigid signs and frames. Supplied in two storage bags for easy transportation. The kit also includes site layout guidance from the "Safety at Street Works" Red Book.

Kit includes tripods and the following 750mm signs:

2 x Men at Work

1 x Road Narrows Offside

2 x Men at Work - End 1 x Road Narrows Nearside 2 x Keep Right

• Wind Tunnel tested to 60mph

• Weight: 30kg (3.7kg per sign)

Storage Dimensions (HxWxD): 500 x 1500 x 300mm **5** 7669

Customise these signs by

quoting the relevant code and supplying the required message / image.

Fold-up Road Signs

These signs have been designed specifically for short to medium term work-zones, they are compact and easy to store and transport when collapsed. Tripods are manufactured from rust-proof aluminium and all metalwork has bright zinc plating to prevent corrosion. The sign faces are constructed from reinforced grey PVC with a reflective material protected by a clear PVC top layer for additional durability. These signs have a ground clearance of 300mm (as specified by UK Road Sign Legislation).

Circular with Reversible Arrow

The reversible option on this fold up sign allows the arrow position to be changed and allows one sign to be used for either a keep left or keep right message. The arrow can be removed and attached using the rust free press studs to ensure the correct direction is shown. An economical and flexible solution to traffic management.

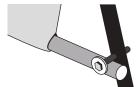

750 x 750mm 5 7681

Rectangular / Circular Set Up

Lightweight and easy to erect. These signs fold up for compact storage and transportation purposes.

At the top of the sign panel there is a concealed hook on springs that provides tension to keep the sign taut.

The bar at the bottom of the sign panel extends to hook under the spacer bolts on the front legs of the tripod.

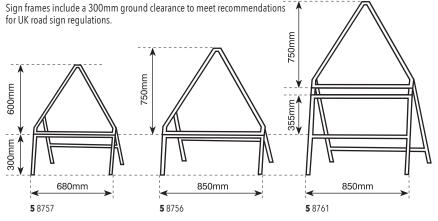

A hook on the back leg of the tripod enables a ballast to be used in volatile conditions

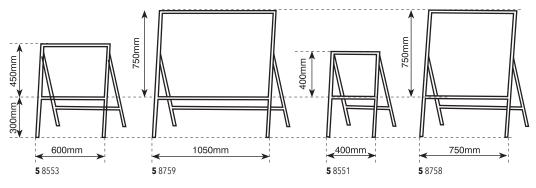

Single Sided Sign Frames

Grey Zinc Painted Steel

Road Frame Clip

Keep signs securely in the frame with our Road Frame Clips. Zinc plated steel for protection against corrosion. Minimum recommended number of clips per frame is four.

5 8755

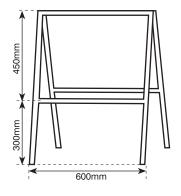

Double Sided Sign Frame

This robust double-sided frame is an ideal solution for temporary outdoor signs in car parks, construction sites, event sites and workplaces.

Manufactured from angle iron mild steel with grey zinc coating to protect from corrosionn this sign frame is designed to hold two 600 x 450mm signs (one either side) for maximum awareness.

We recommend the use of at least four road frame clips per sign (sold separately)

Site Safety

It is important to understand the messages on construction site safety signs; they are displayed to deliver a clear health and safety message. Failing to abide by a sign could result in the loss of your job, or even your life. Signs come in many forms, from site hoarding and entrance points, to way guidance and will often consolidate several key safety messages onto one site safety board to avoid excessive sign clutter. Site signs deliver important information to warn of hazards or requirements that must be followed.

Maintain a register of authorised contractors on site for use in case of emergency or for record tracking/invoice verification. Issue specific and clear ID for the contractor to display whilst on site (badge wallets sold separately). Ensure that Contractors have given commitment to site induction processes, and rules and regulations whilst on site. Record the authorised Work Location and Type of Work to be undertaken. Prompt for additional Permit to Work for where activity is high hazard or potentially hazardous. Includes notifications of Health and Safety instructions and Fire Register, whilst a data protection sheet keeps visitors' data confidential.

Includes 108 passes Folded Pass: 103mm x 84.5mm - Book: 412mm x 280mm Badge wallets with clips **5** 6073

Branded & Bespoke Signage

Bespoke Site Safety Board

Creating your own site safety board has never been easier. Follow the three simple steps below and we can create a bespoke board showing your messages of choice with (or without) your company branding to ensure everyone understands your site specific rules and obligations. Manufactured on 5mm foam PVC these large format boards are perfect for positioning at site entrances to reinforce key safety messages and raising brand awareness in the process. If the templates below don't suit your needs then we are happy to quote for alternative sizes and materials.

Step One: Choose your Board

Select the board size needed and whether you require it to include your company logo / branding and contact details.

Space for four of the signs below

Without Logo

5mm Foam PVC

600 x 900mm

5 8039

Branded 5mm Foam PVC 600 x 1200mm

Space for eight of the signs below

Without Logo 5mm Foam PVC 1200 x 900mm 5 8048

Branded 5mm Foam PVC 1200 x 1200mm 5 8047

Space for four of the signs below

Without Logo 5mm Foam PVC 600 x 1000mm 5 8034

Branded 5mm Foam PVC 600 x 1200mm 5 8019

Step Two: Choose the Messages

5 8030

Select the messages you wish to display on your board. You can select from the following (our most popular site safety signs) however if you require a different sign you can include alternative sign messages found throughout this catalogue by choosing option P and quoting the appropriate sign code.

No admittance

or unauthorised

services

If you have selected a branded site safety board, please supply a high resolution copy of your logo, contact details and/or project information. EPS, PDF or Ai logo files are ideal however a clean, non pixelated high resolution jpeg should suffice (around 1500 x 1500 pixels).

This shows an example of the branded board design 5 8047 and includes a choice of 8 messages

For our range of standard pre-printed site safety boards see pages 120 - 122.

Site Safety Boards

Choose from our standard range of site safety boards. You can add company logo, project and contact details using the "Branded" codes.

Material Information

Foam PVC is a lightweight, rigid and durable material, easily drilled or screwed through, perfect for both indoor and outdoor use making it ideal for site boards. Has the added benefit of being difficult to ignite and is self-extinguishing.

4mm fluted twin wall polypropylene sheets offer a budget option for short term site boards. 100% recyclable, lightweight and waterproof, easily drilled for fixing to fencing, and hoardings

Scaffolding Tags

These double sided scaffold tie tags are ideal for highlighting important safety information on fixed scaffolding. Supplied in packs of 10 and come with 150mm cable ties.

Matt PVC 80 x 150mm

Worker ID Tags

Worker ID products provide paramedics and first-responders with critical medical information for faster and more appropriate treatment. It also provides important contact information to allow responders to notify loved ones of the situation immediately. With the ID tag's security seal, workers can be sure their personal information remains secure until required.

Made from durable, reflective, water-resistant and non-conductive materials and can stand up to tough conditions. Helmet safe adhesive backing and the synthetic paper ID tag inside is 100% waterproof, so vital information stays dry and safe.

Custom Made Signs

We can create custom signs to include company branding or site specific information. Advise us of your requirements for a quote or refer to page 148 for more information.

Near Miss Station

Take a proactive approach to improving site safety and ensure that all near misses and incidents are recorded and acted upon with this near miss station. Includes a suggestion box to store near miss slips (Slips sold separately).

10mm Foam PVC

Near Miss Slips

Allow near miss incidents to be recorded and show the actions taken to eliminate repeat occurrences.

Pack of 10 Matt PVC 80 x 150mm

Reverse

Suggestion Box

Fabricated in yellow polystyrene with a clear acrylic A5 sign holder on the front (insert your message of choice). The pocket behind the holder can be used to store your near miss tags. Sliding door at the rear gives access to remove the contents. The box is freestanding but can also be wall mounted.

Yellow Polystyrene with a Clear Acrylic front W 275 x H 275 x D 100mm with 145mm Wide Slot

Near Miss Record Book Station

A near miss record book is an ideal way to keep track of incidents that almost result in injury, allowing you to improve your health and safety measures in the future. Ensure your employees make good use of the record book by wall-mounting it with this station (pre-drilled for easy mounting). (Books ordered separately - see page 45).

3mm Thick Plastic 360 x 220 x 15mm

Notice Boards

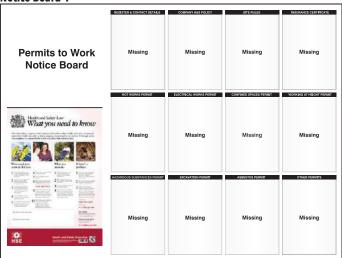

A range of notice boards manufactured from 5mm foam PVC. Helps to ensure everyone is aware of site rules and procedures at all times. They include clear document wallets to place relevant documentation inside. A Health & Safety Law Poster is also included on each board. If documents are removed from the wallet a "Missing" message will be displayed.

Branded Notice Boards

We can add company details and branding to our range of Notice Boards or if you're looking for something completely bespoke we can provide you with custom Notice Board designs to suit your needs. Contact us now for a quote.

Site Saver Safety Signs

This range of signs are manufactured using a 4mm thick fluted polypropylene material. This low-cost material allows us to provide you with your own branded signs at an affordable price (perfect for temporary site signage - strong, lightweight and waterproof). Send your high resolution logo at time of ordering for inclusion on site saver signs at no extra cost. If you can't see the sign you require please contact us as we can produce any design on a variety of materials.

Extending Barrier

Space saving metal barrier. Stands 1 metre high and expands to 3 metres in length.

Concertina design allows the barrier to be quickly extended for immediate use. Made of steel, assembled with rivets with lacquered paint finish. Ø25 mm post, Ø 30 mm feet

Weight: Approx 8kg 3000 x 1000mm **5** 7994

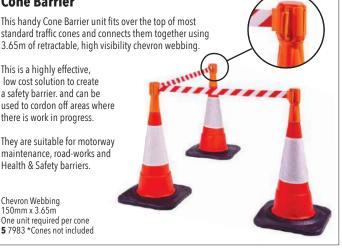

Cone Barrier

This is a highly effective, low cost solution to create a safety barrier, and can be used to cordon off areas where there is work in progress.

They are suitable for motorway maintenance, road-works and Health & Safety barriers.

Chevron Webbing 150mm x 3.65m One unit required per cone 5 7983 *Cones not included

Barrier Tape Post

This red painted steel post is simply pushed into the ground for the quick and easy deployment of barrier tape.

The forged steel pointed tip enables easier insertion into earth.

Once the posts are in position simply wrap your barrier tape of choice around the post to secure an area quickly and efficiently - ideal for construction sites or event management.

12mm Diameter Steel 1200mm height 1.8kg weight 5 8619 *Tape not included

Additional barrier tape messages and designs are available upon request so if you cannot see the message you require please specify the wording, colours and width/length that you would like and we will advise of availability and price. Custom print jobs may incur extended lead-times.

A simple tagging and

checklist system designed

to improve safety, reduce

maintenance costs and

comply with legislation.

all to see, removing any doubt as to when the last check was completed. This enables inspectors to spot potential faults, before they develop into a more costly or serious defect.

A perfect addition to any safety or maintenance management programme and meets requirements of PUWER (Provision & Use of Work Equipment Regulations), LOLER (Lifting Operations and Lifting Equipment Regulations) and WAHR (Working at Height Regulations).

We now also offer a paperless option in the form of the "TakeAIM" app.

Complete workplace inspections directly on a smart phone / tablet by accessing comprehensive checklists

for each asset. Each checklist allows users to add photos and notes to back-up their inspection findings.

This system allows companies to inspect any type of equipment digitally.

An online dashboard manages the data and gives management easy and instant access to all data. TakeAIM enables data to be analysed to help spot trends and any recurring issues, helping with planning maintenance and ensuring replacement parts are available when required.

To find out more please quote product code "TAKEAIM" to arrange a call-back.

The ability to monitor and record equipment helps improve safety and maintenance programmes, whilst efficiency by allowing faults to be

saving money and maximising identified early and arranging repairs before they develop into something

more serious and costly.

This simple but highly effective Safe Equipment Management System allows pre-use inspections to be completed on workplace equipment and the findings clearly displayed for

Checks for all workplace equipment

Good to Go Safety have supplied companies worldwide with millions of equipment inspections and we now offer a paperless option in the form of the "TakeAIM" app.

Annual Kits

Regular equipment inspections can help identify potential faults before they develop into costly and dangerous defects.

The frequency of inspections can be defined by a wide range of variants. On occasion, legislation will set out the specific time period that checks must be made or alternatively a risk assessment may define how often an inspection should be carried out (based upon the level of risk and the potential outcome if a fault goes undetected).

Using the Good to Go Safety system will help you improve safety, reduce maintenance costs and enable you to comply with the relevant legislation. Kits are supplied in a reusable box enabling books to be stored / filed securely. Replacement components can be purchased independently as and when required.

Daily Inspection Kit

The daily inspection kit provides you with everything required to carry out 275 inspections (ideal for one year of daily inspections).

Within the kit you will receive:

2 x Status Tag - Attach to the equipment and show its status.

11 x Check Books - (275 checklists) allowing one to be completed each week and the findings displayed inside the status tag.

300 x Tamper Evident Seals - Deter and identify unauthorised access to the status tag

1 x Wallet - Store the current book and provide a suitable writing surface when completing checklists

1 x Pen - Store inside the wallet to ensure there is always a way to record findings

*based on a five day working week

How it Works

One of the many reasons why people like to use Good to Go Safety is its simplicity and ease to integrate into a company's safety and maintenance programme. Simply attach a tag to the relevant equipment and select the appropriate check book to start carrying out the inspection at a frequency of your choice. Inserting the completed checklist into the tag on the equipment provides a clear visual breakdown of what was checked and when – removing any assumptions or uncertainties. A duplicate copy is retained in the book for management records and providing invaluable evidence in the event of an accident.

Tag it

Attach a universal status tag to the piece of equipment. Ideally at the point of entry.

Check it

Use the appropriate check book to complete a comprehensive inspection.

Record it

Complete the inspection checklist and record all findings. Sign and date.

Insert it

Remove the top sheet of the checklist, fold where prompted and insert into the status tag.

Secure it

Fit a tamper evident seal to provide additional security and ensure findings are legitimate.

Display it

The universal status tag will now display the date and the findings of the inspection.

Components & Accessories

Good to Go Safety has three main components, the Universal Status Tag, Inspection Check Books and Tamper Evident Seals, these components make up our simple and effective preventative maintenance system. The Good to Go System can help detect damaged or faulty equipment early and can help to prevent accidents and/or reduce maintenance costs whilst ensuring that legislative requirements are met (PUWER, LOLER, WAHR) and more.

Universal Status Tag

Attach to workplace equipment (usually at the point of entry) and advise employees when the equipment is safe to use or quarantined following an inspection. Unlike other tagging systems this tag has been designed to attach to all types of equipment. The channelled base allows a flush fitting onto scaffold tubes and the small sleek design ensures that it doesn't interfere with daily equipment use.

Due to being manufactured from tough, durable, UV stable, weather resistant polypropylene it can withstand harsh condition - whether attached to fixed scaffolding during a thunderstorm or attached to a ladder being tossed around in the back of a van, this status tag can resist it all.

The highly visible yellow design ensures staff are reminded to complete pre-use checks. When the tag is empty the window displays a "Do Not Use" message - this means an inspection has not been completed and the equipment should not be used. Once an inspection has been completed the status tag holds the top sheet of the checklist and the window will display the date and the equipment's status.

The design includes two sleeves to enable cable tie attachment. Four holes for riveting or screwing onto equipment and the design is lightweight enough to ensure that adhesive can be used as a fixing option.

Polypropylene 120 x 52 x 13mm (H x W x D) **5** 1301

Inspection Check Books

Each of the Good to Go Safety Check Books have been specifically designed to provide comprehensive inspections for workplace equipment in order to help meet the relevant legislation, industry guidelines and best practice.

Each check book includes 25 inspections. Once an inspection has been completed, the top sheet (white) is removed from the book, folded at the prompted lines and placed inside the tag to display the current status of the equipment...either "Do Not Use" or "Good to Go". The secondary sheet (yellow) is a carbon copy which should be retained within the book.

Carbon copies can provide invaluable evidence of your Safe Equipment Management System (SEMS) history in the event of an accident.

Every check list requires a name, details of the asset in question and lists a series of questions regarding the asset. Each checklist has a unique sequential number to aid audits and management documentation.

Useful guidance can be found within the inside sleeve of the Check Book to help highlight what inspectors should be looking for during the inspection.

Custom options are available. Please let us know if you have a specific requirement for equipment we don't currently offer.

Forklift: !	5 1302	Pallet Truck:	5 1336	MEWP:	5 1322	Excavator:	5 1342	Telehandler:	5 1370	Overhead Crane:	5 1351	Tow Tractor:	5 1357

Wallet & Pen

A useful accessory to protect the Good to Go Safety Check Book from general wear and tear whilst in use.

The wallet is PVC coated to help protect the checklist from contaminants such as water, dust or oil. The wallet also provides inspectors with a solid writing surface whilst they are on the move.

The Check Book (not included) slips into a secure sleeve on one side of the wallet and on the other side there are useful guidance notes regarding the Good to Go Safety system.

The ball point pen is stored inside a tight sleeve within the wallet ensuring it is always available during inspections.

Tamper Evident Seals

Provide a visual indicator that an inspection has been completed and verified by a competent inspector. Using the Seals ensures the findings within the Status Tag are not tampered with and the correct status is always shown.

If a Tamper Evident Seal is missing, employees should not use the equipment until the checklist has been confirmed and a new Seal is inserted by a competent inspector.

Manufactured from blue acetal thermoplastic to offer maximum visibility against the yellow status tag.

The design enables the arrow head to fit snug into the status tag and the neck has been hollowed in order to help the seal to snap easier when pulled forward.

A simple solution to provide additional security measures to equipment safety.

Polypropylene olied in boxes of 100

PVC Coated 250 x 235 x 3mm (Flat) 250 x 115 x 8mm (Folded)

Dispensers

Setting up a warehouse, factory or site in an efficient and organised manner is beneficial for a number of reasons. Not only does it assist in inventory control and time management, but it also streamlines the entire process of completing inspections, from re-ordering and auditing to selecting and storing.

Information Station

This wall mounted information station provides details of the Good to Go Safety equipment inspection process whilst offering easy access to check books from an organised central location.

Ideal for warehouses, factories or within site offices where equipment inspections can be misplaced or damaged.

The information station comes with five acrylic check book dispensers. Each dispenser holds up to ten check books (not included) ensuring that even busy warehouses have enough space for fifty check books.

The dispensers not only keep your check books organised, but they also provide visual awareness when replacement books are required to be ordered. Supplied with a high bond adhesive backing for easy application to the board but can also be screwed into place.

The board is manufactured from 10mm Foam PVC which ensures the information station is strong and sturdy whilst also enabling easy drilling for wall mounting.

Adding your company logo is included in the cost of the information station. Remember to supply us with a high resolution file when placing your order.

10mm Foam PVC 700 x 750mm

Bespoke Information Station

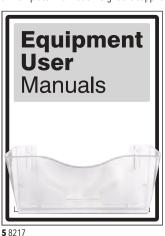

If you require to show a different equipment type or wish to have a completely bespoke information station please contact us for a quote.

Document Holding Signs 10mm Foam Board - 440 x 600mm

Keep important safety documents clearly displayed and in a readily available place. These displays help companies organise their important documents and help staff remain informed and up to date regarding all workplace information. Signs are supplied with a clear polystyrene document holder.

5 8218

Document Holder

A durable clear polystyrene document holder which is pre-drilled for easy wall mounting using the supplied fixing kit.

Polystyrene 380 x 180 x 105mm (W x H x D)

Acrylic Dispenser

This acrylic check book dispenser holds up to ten check books (not included) ensuring that equipment inspections are easy accessible from a central location whilst ensuring they are not misplaced or irrevocably damaged.

The dispensers not only keep your check books organised, but they also provide visual awareness when replacement books are required to be ordered.

The acrylic dispenser is self standing but is also pre-drilled for simple wall mounting.

External Dimensions: 165 x 117 x 76mm (H x W x D) Internal Dimensions: 160 x 109 x 65mm (H x W x D)

Weather Resistant Folder

These industrial strength pockets are perfect for storing check books and manuals on outdoor equipment.

The press seal fastening keeps those important inspection checklists clean and dry and always on location.

The folder comes with a high bond adhesive backing strip for semi permanent fixings to your equipment.

Clear PVC Holds A4 documents

Inspection Posters

420 x 594mm - These posters are printed on an eco-friendly, PVC-free synthetic paper that supplies excellent tear and water resistance properties.

Reinforce the importance of completing pre-use inspections on workplace equipment with these workplace safety posters. This range of posters have been designed in order to provide strong visual reminders to employees and highlight components included in the Good to Go Safety inspection check books. A perfect addition to your safe equipment management systems.

Anti-Rotational Clip

Simple installations are achieved by inserting the 'foot' into the sign channel, and twisting the clip through 90°. The bolt then secures the other end. Raised pips on the inner help prevent sign rotation.

Stainless Steel 50mm Diameter **5** 8640

Stainless Steel 76mm Diameter **5** 8682

Base Plate

Recommended for secure and level anchoring of sign posts. Install this base plate approximately 600mm below the surface and tighten post to create a stable post. Zinc coated steel base plate.

Steel 50mm Diameter **5** 8699 Steel 76mm Diameter **5** 8686

2 Piece Saddle

Saddle that slides into the sign channel. The saddle accepts all bands up to 19mm (3/4") and as the band tightens the saddle clamps tightly against the channel holding the sign securely in place.

70 x 30 x 30mm **5** 8754

Back-to-Back Clips

Allows 2 signs to be fitted back to back to a steel post. Back to Back clips are fitted with M8 bolts. Two clips are required per channel whether one or two post mounting. Supplied in pairs.

Stainless Steel 50mm **5** 8689

Stainless Steel 76mm **5** 8725

Banding Tool, Buckle and Straps

Has a tensioning capability of 2,400lbs and a built-in cutter for use with banding straps up to 19mm wide. Firstly, push band through buckle teeth towards the operator, ears up. Pass band around object and again through buckle. (For best results repeat this operation to obtain double banding). Anchor end of band by folding back under buckle. Take up slack. Then place band in slots of tool and push nose of tool against the buckle. Grip band with clamping lever and apply tension by turning handle. Maximum pressure is being applied when there is no appreciable movement of band between nose and clamping block. Then you can swing tool over buckle. This movement increases tension of band and, to avoid breakage, handle must be reversed slightly as tool is swung over, whilst maintaining band tension. Cut band with cutter lever and slide tool off in same position (or tension will be lost). Finally, hammer ears down over cut band.

Banding Tool 5 8751

Banding Strap 19mm x 30m **5** 8752

Banding Buckle Pack of 10 5 8753

Tamtorque Clamp and Driver

These tamtorque clamps are manufactured from stainless steel and have been designed for clamping signs to all types of posts. They give a quick and reliable fix to round, square or hexagonal posts every time. It removes the need to cut the band to size and therefore have no sharp edges, which can snag or cut. Unlike other banding systems, the tamtorque clamp can be easily reused or readjusted. Tamtorque clamps are manufactured from high strength stainless steel and have a hardened tamper resistant screw with a unique recessed seven-sided socket. This means that they can only be tightened or released with a special Tamtorque driver. An auto locking safety buckle ensures the free end of the band is safely tidied away.

Attach to sign channel with a 2-piece saddle (sold separately)

Tamtorque Clamps 70 -100mm

100-130mm **5** 8772 **5** 8774

190-250mm 5 8780

2 Piece Saddle 70 x 30 x 30mm **5** 8754

Tamtorque Driver 58770

Installation Guide

1. Thread the band through the two-piece saddle and around the post.

2. Screw the band through the housing using the driver or power tool.

3. Push any remaining band into the buckle for a safe, tidy finish.

4. Hold down any excess band while finally tightening.

5. Tamtorque can be released and re-positioned if required.

Internal Fitting

Whatever the sign, we can supply the necessary fixings to ensure it is clearly visible using sign frames, adhesives, posts and clips, screws and cable ties.

Adapt-a-Sign Frames

Adapt-a-Sign frames enable you to print off your own message and insert inside. A perfect solution for displaying constantly changing information.

Coronavirus Information Signs

Research has revealed that 80% of people in the UK feel safer in venues with clear, professional COVID-19 signage. The study has revealed that people are more likely to shop in stores with clear instructions on social distancing measures. The findings also indicate that brands risk reputational damage from inadequate COVID-19 signage.

Stairway, Floor Level & Dwelling ID Signs

To assist the fire and rescue service in identifying each level of a building, storey identification signs indicate the level by "Floor Number" and should be located on every landing of a fire-fighting stairway and every fire-fighting lobby (or open access balcony) into which a fire-fighting lift discharges. Storey ID signs should be supplemented by dwelling indicator signs (positioned directly below the Storey ID sign), which provide information as to the dwellings (flats or maisonettes) located on the storey in question.

Directional Emergency Escape Signs

Emergency escape signs are provided to guide you from wherever you are in a building, via a place of relative safety (the escape route) to the place of ultimate safety (the assembly area). It must not be assumed that everyone will know all safe routes through the building. Emergency escape signs should comply with BS EN ISO 7010:2020 to ensure maximum levels of understanding. The old EC Directive (92/58/EEC) designs should no longer be used due to their low comprehension credentials.

Intermediate Emergency Escape Markers

In addition to the requirement for installing exit signs at 1.7m - 2.2 metres from the ground, ISO 16069:2017 recommends that additional intermediate markings positioned at a maximum height of 400mm from the floor may also be required. Subject to a full risk assessment, additional escape guidance should be provided through the use of both continuous guidance lines and safety signs to ensure there is an uninterrupted safety sign system to aid safe evacuation from a building.

Fire Safety Signs

The Regulatory Reform (Fire Safety) Order 2005 places responsibility of fire safety on employers to ensure that a fire risk assessment has been conducted to establish fire risks and that appropriate actions are taken to reduce them. Failure to comply could lead to severe legal penalties. Under the Regulatory Reform (Fire Safety) Order 2005, any non-automatic fire fighting equipment should be positioned and signed in accordance with BS EN ISO 7010:2020 to ensure maximum levels of comprehension. By positioning an appropriate fire equipment sign at a height between 1.7m - 2m from the floor it helps to locate and identify essential fire equipment in the event of it being obscured by furnishings in the room.

Fire Door Signs

Every fire door should have a "Fire door Keep shut" sign fitted. When doors can be used from both sides a sign is required on both sides. Doors that open on to a fire escape corridor should be locked shut and signed accordingly. The window stickers are all double sided and designed for use on glass doors. They ensure the message is visible from both directions.

EasiFIX Fire Action Kits

These Fire Action EasiFIX Kits provide you with two signs in one. The design enables you to pop out the fire alarm symbol from the main sign then simply slip the main fire action sign around a call point. The "popped out" call point symbol should be placed on the wall above alarm at a height of between 1.7 and 2 metres from the floor.

Manufactured from Photoluminescent Self Adhesive Vinyl Main Sign: 150 x 330mm Pop-out: 100 x 100mm

Custom Signs

Whether it's for a prestigious hotel or an after school club, our custom made signs allow you to get creative and provide a truly unique signage solution. Once you know how you want your sign to look, simply follow the steps below to begin the process of creating a bespoke sign.

1. Choose your Material

When ordering a sign, consideration should be given to the environment it will be located within – is it internal or external? Is it for display in a warehouse or a prestige hotel? Select the required material from the grid below. This grid is not exhaustive so if you can't see the material or size you require please contact us and we will be happy to quote.

Materials	Codes	Details Required for a Custom Sign Quote	Price
Rigid Plastic	CUST001		
Self Adhesive Vinyl	CUST002		
Photoluminescent Rigid Plastic	CUST003	Size: Please refer to our "Popular Size"	
Photoluminescent Self Adhesive Vinyl	CUST004	chart or specify your own	
0.9mm Aluminium	CUST005		Supplied
2mm PET (Polyethylene Terephthalate)	CUST006	Orientation: Landscape or Portrait	on
Rigid PVC with SAV Backing (Quick Fix)	CUST007	'	Request
3mm Foam PVC	CUST008	Quantity: Please state your required quantity	'
5mm Foam PVC	CUST009		
3mm Aluminium Composite	CUST010	Content: Please specify or provide artwork	
0.9mm Reflective Aluminium	CUST011	1 .) .	
PVC Banner with Eyelets	CUST012		
4mm Fluted Polypropylene	CUST013		

Popular Size	Choices
80 x 80mm	400 x 200mm
100 x 75mm	400 x 300mm
100 x 100mm	400 x 400mm
100 x 150mm	450 x 150mm
150 x 150mm	600 x 200mm
200 x 75mm	600 x 400mm
200 x 100mm	600 x 450mm
200 x 150mm	800 x 600mm
200 x 200mm	900 x 600mm
210 x 297mm	1050 x 750mm
300 x 100mm	1200 x 800mm
300 x 150mm	1200 x 1200mm
300 x 250mm	2400 x 1200mm

2. Supply Information

In order for our sales team to provide you an accurate quote in addition to material type, please provide the following details: Size, Orientation and Quantity.

3. Provide Artwork

With a team of talented graphic designers and printing experts, we will ensure that each custom sign is set up and manufactured to the highest standards.

When ordering your custom sign, simply provide us with the relevant artwork or send us an image, link or sketch your sign idea and we will provide a proof for your review.

1. Sketch & Snap / Scan

Mock up your desired sign, take a picture of it on your phone and send it to us via email. Please don't worry if you're not artistically inclined just remember to include material, colour, text and sizes.

2. Snap & Email

If you've seen a sign you require simply take a photo of it on your phone and send us the picture. We'll then mock up the design based on your instructions and send you a proof to approve, following receipt of your order.

3. Send a Link

Seen a sign you like on a website? Send us the link or a screenshot, along with any additional comments relating to the size, material, or any alterations and we'll provide you with a quote. Please be aware, there may be copyright restrictions.

Image & Logos

Please ensure all images / logos you send are high resolution to acheive a quality print finish. A high resolution file JPEG, PDF, EPS or Ai file of your company logo is ideal. **Taking a logo from a home page of a website will not do.** Low-resolution images are the main reason for slow production of custom specials. Have your logo ready prior to order to ensure quick order turnaround.

If you are finding it difficult to find a high-resolution version of your logo you can sometimes find it via **images.google.com** simply drag your low-resolution logo file into the search bar and Google will search the internet for images that are similar. If there are any higher resolution logos found on the internet they will load. If all else fails we can reproduce your logo so it prints correctly - additional charges will apply.

Safety Signs Checklist

This checklist can be used to help carry out a safety sign survey of your premises. Although not extensive, it has been designed to help highlight any clear gaps in your current set-up and identify the relevant products to help ensure compliance with British and International Standards. **Upon completion of the checklist, if any of your answers are NO then use the page reference to find the recommended signs to rectify the issue.** You should check the condition of existing signs and replace any that are showing excessive wear and tear, display old symbols or where the graphics are fading as this may make them difficult to read. Look for consistency in terms of graphics / text format to maximise comprehension levels and minimise any risk of uncertainty.

Buckled or Bent Signs

Faded or Sun Damaged Signs

Chipped or Cracked Signs

Incorrect Colours

Old Symbols or Capital Letters

Outside and at Point of Entry into the Building

outside and at Fornt of Entry into the building			rage neierences
Is the assembly point clearly identified?	γ	N	20
